## RESIDENCE

The Atlantic Police Academy's Police Science program is located at Slemon Park in Summerside, Prince Edward Island. Cadets are required to live in residence in single person rooms, for the duration of training excluding the on-the-job training component. The residential environment serves as a training lab in the same way as the driving track and firing range. Residence provides experiential learning that would not be possible if students interacted with one another in an instructional setting alone. Residence allows students to develop skills in teamwork, problem solving, time management and communication. Additionally, residence life allows for the development of attitudes such as gender and cross-cultural sensitivity that are essential to a successful career in the policing community.

## DRUG USE QUESTIONNAIRE

A history of the use of certain drugs may disqualif
